

CERTIFIED PUBLIC ACCOUNTANTS

Abdulmalik & Partner

Company Profile

Professional clarity · Considered decisions · Service across Saudi Arabia

Licensed by SOCPA — License No. 1184

1 A professional perspective for clearer financial decisions

Abdulmalik & Partner is a certified public accounting firm licensed by the Saudi Organization for Chartered and Professional Accountants. We provide assurance, Zakat, tax and compliance, financial advisory, and accounting and finance transformation services to organisations throughout Saudi Arabia.

Our approach connects technical precision with business reality. Every engagement starts with a clear understanding of the requirement, an appropriate scope, and defined professional deliverables. This profile does not promise a particular result; the nature and deliverables of each assignment are determined by its facts and the agreed professional terms.

HOW WE WORK

1.1 From context to a usable professional output

Understand the context	We begin with the activity, requirement, and relevant records—not a generic service label.
Define the scope	We identify the professional starting point, capability, and expected output before execution.
Execute with discipline	We apply an appropriate professional methodology while keeping communication clear and work points documented.
Deliver a usable output	We provide organised outputs that support understanding, follow-through, and decision-making.

2 Four professional groups. Specialist services.

Our services are organised into four professional groups, so the conversation can begin with the actual business requirement and the appropriate professional path can be defined before work starts.

Assurance

Independent, methodical work across financial information, controls, and specialist engagements, including audit, internal audit, forensic accounting, and hospitality audit according to the scope of each assignment.

Tax & Compliance

Organising Zakat, tax, and related compliance requirements around the operating context, including returns and related requirements under the applicable rules and facts.

Financial Advisory

Financial and practical insight for decisions, growth, and financial due diligence before consequential transactions, with support shaped around the circumstances of each engagement.

Accounting & Finance Transformation

A clearer accounting and technology foundation for growth and operational change, including accrual-basis transition and accounting and technology support.

INDUSTRY CONTEXT

2.1 Capability begins with business context

Financial and control requirements change by activity and business stage. We therefore begin with sector context and direct the conversation toward the professional service line that is most relevant.

Real Estate & Development

Construction & Government

3 We serve you wherever you are in Saudi Arabia, and our team reaches you.

We organise scope, communication, and deliverables around the context of your organisation and the engagement requirements, without requiring attendance at a specified location. The conversation begins with the requirement, available documentation, and the professional capability that fits it.

Saudi coverage

Professional service where your organisation operates.

Clear coordination

Structured communication and defined deliverables.

Appropriate scope

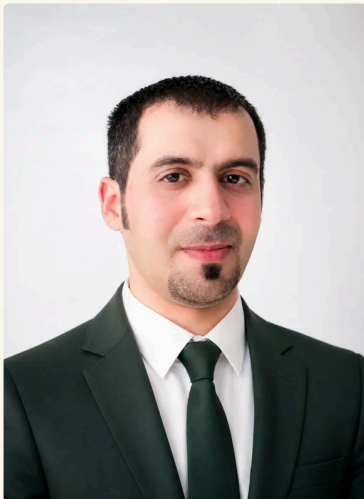

Defined before the engagement begins.

PROFESSIONAL COMMITMENT

3.1 Trust begins with information you can verify

The firm's professional licence can be verified through the [SOCPA Licensed Accountants Directory](#). We do not publish absolute promises or unsupported outcomes; the scope and deliverables of each engagement are set out through a clear professional agreement.

4 Responsible leadership grounded in professional context

Abdulmalik bin Hassan Al-Abdullah

Founding and Managing Partner

Certified Public Accountant · Full Member, Saudi Organization for Chartered and Professional Accountants

The Managing Partner has 15 years of experience in the financial sector with Saudi financial institutions. His professional experience includes audit, financial advisory, international taxation, Pillar Two, and withholding tax, with each engagement assessed according to its scope and the relevant requirements.

AMK TEAM

4.1 Supporting specialisms within a clear engagement scope

Abdelrahman Mostafa Arafah

Forensic Accounting & Financial Disputes Specialist

Specialises in accounting examinations and analysis of financial records and flows for forensic accounting and financial-dispute engagements.

CFE · FMVA®

Daniel Joy Gado

International Financial Reporting Standards Specialist

An International Financial Reporting Standards specialist from Singapore, supporting the team on technical matters relating to practical IFRS application.

5 A professional knowledge centre for considered conversations

AMK Insights provides practical professional material on business decisions and financial, tax, and regulatory topics relevant to Saudi Arabia. Each published item includes its category, author or reviewer, publication or update date, reading time, and related service. Regulatory and tax topics are presented with an official source and last-reviewed date.

Start a clear professional conversation

Tell us about your activity and the subject that needs professional support. This helps us direct you to the appropriate service line and identify a practical starting point for the discussion.
